

Lesson 11: Practice Exercises

Select any one of the following Practice Exercises so you can perfect your skills of planning wall closets. You will need to have the following tools: Personal Closet Inventory, design grids, 15 Steps of Designing, Basic Sections Sheet, a ruler, calculator and a pen or pencil.

Plan the closet on a design grid then print out the answer. Repeat the process with another Practice Exercise until you are comfortable. Once you are confident then you may move on to the next section.

If you want to further test your knowledge, print the answers of the Rough Sketch and draw the final design of that closet using the 15 Steps of Designing. Those answers are also available to print. Planning and drawing closet is an important element in your success.
